Non-Executive Director • SME Advisor • Growth Strategist

A proven Non-Executive Director and Business Consultant with successful experience in advising start-ups, SMEs, and community groups & enterprises; also in managing large scale programmes.

Repeated success in finding innovative solutions proven vital to the delivery of major projects, financial growth and transformation of public and private organisations. Specialist in quickly understanding business dynamics, adopting a full range view to mediate conflicts and bring all arms of an organisation together. With unique insight into turning around companies across sectors, growing family owned and private organisations, advising local charities on governance and scale-up, and driving education and community regeneration programmes/projects. Teaches CEOs and Boards to embrace change, adopt fresh approaches and look deeper to find imaginative solutions.

| 7. Costings Analysis | 8. Mediation & Negotiation | 9. Board Leadership |
| 10. Economic Development | 11. Performance Assessment | 12. Comms & IT Solutions |

Skills and Achievements

Strategy

- Bristol City Council – Contracted to turn around and deliver a large £3 million regeneration and education programme funded externally.
 - The drafters of the applications had left BCC; no personnel in place to move the programme forward.
 - Tracked down all the application forms and associated contracts, met with all sub-project managers and client groups, had a full reporting framework in place within weeks.
 - On the strength of this, gained an additional £1 million in funding to augment the original programme.
 - One of the outcomes was a city-wide “Extended School Partnership” system which facilitated the sharing of school resources with local communities and enterprises. The system is still in place today.
- Co-operative Solutions - have provided advice to start-up businesses and SMEs looking to expand. Have specifically advised companies with succession issues in the matter of selling the enterprise to the workforce.
- Luton Borough Council – Drafted the economic development strategy for several years running.
 - This included a package for responding to local company closures (including Electrolux) and an orientation towards green technologies long before such technologies were widely in vogue.

Governance

- Cooperative Solutions – Engaged in a wide variety of advisories on matters of responsibility and liability.
 - Ranged from SMEs, co-operative and community businesses to stand alone funded programmes requiring evaluation and auditing.
- Fully versed in company and trust law. Eg:
 - Assisted a local company on converting to a charity. Advised on trading restrictions which can apply to charitable enterprises and suggested they set up a separate trust, with the same objectives, to run in parallel.
 - This they did and are now able to attract charitable funds as well as contribute their own to the trust whilst continuing to trade as before.
- As Project and Programme Manager, familiar with assessing risk and incorporating risk management strategies in proposals for monitoring and evaluation.
- As Chair of Governors at Okehampton Community College, grappled with struggling school strategies, including review of formal documentation. Ultimately recognised by National Governance Association as “exemplary”.
- As Chair of Northampton Town FC Trust, pulled the organisation back from the brink of dissolution and set it on a path of reinvigoration and growth.
 - This included in depth discussions with funding bodies and a full-length recruitment programme.

Finance

- Bristol City and Luton Borough Councils – Managed large scale (£1m+) programmes and projects
- National Treasurer of the Healing Trust – Managed to establish a firm grasp on the financials and mediate conflicts within the Board fairly seamlessly (given the circumstances) such that the wider membership had little or no knowledge of the slowly resolved conflict.
- As NED to Techmaids (established to provide IT employment opportunities for ethnic minority women) provided advice and guidance in terms of managing cashflow.

Technology & Change

- Have set up and maintained own and numerous other websites. Currently exploring cryptocurrencies - likely to be the trading medium of the future.
- At Bristol City Council, a designated “Change Manager” as entire organisation adopted electronic procurement.

Leadership

- Via Cooperative Solutions have facilitated collective decision making both immediately -by attending meetings - and strategically - by implementing Communications and Democracy Audits.
 - In the latter case, a company went on to win a national award for innovation.

25 Years of Board & Management Experience
